Part III: Detailed Office Action:

Claims 10-15 are pending and under consideration.

Applicants request for consideration filed 1/12/2004 has been fully considered.

The new matter objection is withdrawn in view of applicants arguments.

Claim Objections:

37 C.F.R. §1.821(d) reads as follows:

(d) Where the description or claims of a patent application discuss a sequence listing that is set forth in the "Sequence Listing" in accordance with paragraph (c) of this section, reference must be made to the sequence by use of the assigned identifier, in the text of the description or claims, even if the sequence is also embedded in the text of the description or claims of the patent application.

The claims and/or specification are not in full compliance with 37 C.F.R. §1.821(d), and should be amended to refer to the appropriate sequence identifier(s) (SEQ ID NO:). For example, see claims 10-12. As Table 1 is a sequence, reference to such sequence must be by reference to the appropriate sequence identifier. Wording such as "is replaced by an amino acid sequence of SEQ ID NO: X having a set of substitutions selected from the group consisting of those of Table 2a-j" or the equivalent. Correction is required.

The declaration under 37 CFR 1.132 filed 1/12/2004 is sufficient to overcome the rejection of claims 10-15 based upon Curtis in view of Yamasaki, de Sauvage and Souza because the data show a significantly higher induction of CD61 by the fusion protein than by either cytokine alone. CD61 is a marker for megakaryocyte differentiation. As evidenced by Kuby at page 41-42 and Mire-Sluis at pages 237 and 330 (both references made of record herein), one might have expected a synergistic effect on granulocyte (including neutrophil) differentiation using the fusion protein, but not on megakaryocyte differentiation. Further, the greater effect of

the fusion protein *in vitro* (wherein kidney clearance is not an issue) relative to the two proteins in combination would not have been expected.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent Number 5,989,537 teaches and claims the use of TPO in combination with G-CSF for the stimulation of neutrophils. While this reference could have been applied in a rejection under 35 U.S.C. §103(a), the finding above applies equally to this reference.

Claims 10-15 are directed to an allowable product. Pursuant to the procedures set forth in the Official Gazette notice dated March 26, 1996 (1184 O.G. 86), claims 16-18, directed to the process of making or using the patentable product, previously withdrawn from consideration as a result of a restriction requirement, are now subject to being rejoined. Claims 16-18 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Since all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement made in the paper mailed 6/21/02 is hereby withdrawn.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 18 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim is drawn to controlling formation of 'colonies' *in vivo*. Cells are generally not regarded as forming colonies *in vivo*, hence the claim is indefinite. Deletion of the phrase "controlling formation of megakaryocyte colonies and neutrophil colonies and/or" would be remedial.

Advisory Information:

Claims 10-17 are objected to.

Claim 18 is rejected.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
